## Senior Full Stack JavaScript & WordPress Engineer

I am a **Full Stack Developer** with over 4 years of experience in designing and developing scalable, high-performance web applications. I have strong expertise in **Node.js**, **Nest.js**, **Express.js**, and **Next.js**, along with hands-on experience working with databases like **MongoDB**, **PostgreSQL**, and **MySQL**. My focus lies in building clean, modular backend architectures, creating robust APIs, and delivering secure and maintainable code.

Over the years, I've led backend teams, mentored junior developers and interns, and collaborated closely with frontend engineers, designers, and product owners to deliver reliable and optimized solutions. I'm also experienced in replacing off-the-shelf CMS platforms with custom-built systems to enhance performance and reduce operational costs.

I'm committed to continuous learning and enjoy staying up to date with the latest backend technologies, development practices, and team workflows. I value clean code, technical ownership, and working in collaborative, impact-driven environments.

## WORK EXPERIENCE

### Revnix, fmr. Revnix Technologies (SMC-Pvt) Ltd.

02/2022 – Present

#### Lead Backend Engineer • Full-time

Haripur KPK Pakistan

- Led backend architecture and API development using **Node.js**, **Express**, **Nest.js**, and **PostgreSQL/MongoDB**.
- Designed and deployed a **microservice-based architecture** supporting over **50K active users**.
- Implemented **CI/CD pipelines** using **Docker** and **AWS**, improving scalability and reliability.
- Mentored junior developers, increasing code quality and delivery efficiency.

**Key Skills:** Node.js, Nest.js, Express.js, PostgreSQL, MongoDB, AWS, Docker, CI/CD, Microservices Architecture

#### Full Stack WordPress Developer • Full-time

- Developed innovative **WordPress solutions** that enhanced client experience and performance.
- Built **dynamic eCommerce and membership platforms** using **WooCommerce** and **Paid Memberships Pro**.
- Applied **clean architecture principles**, achieving **Lighthouse performance scores of 90+**.
- Created a **custom WordPress CMS**, reducing dependency on third-party plugins by **60%**.

**Key Skills:** PHP, JavaScript, WordPress, WooCommerce, Paid Memberships Pro, Theme & Plugin Development, REST APIs, Performance Optimization

#### Frontend Web Developer • Full-time

- Built **responsive, SEO-optimized** user interfaces using **React**, **JavaScript**, **HTML**, **CSS**, and **SCSS**.
- Collaborated with backend teams to integrate **REST APIs** and improve user experience.
- Enhanced website load time by **40%** and accelerated project delivery by **30%** through reusable UI components.

**Key Skills:** React, JavaScript, HTML, CSS, SCSS, REST APIs, SEO Optimization, UI/UX

## EDUCATION

### Bachelor of Computer Science in Computer Science

Virtual University of Pakistan

## PROJECTS

### The Backyard

Designed and developed a fully custom CMS using **Next.js** and **Drizzle ORM** to replace WordPress, significantly reducing long-term costs and improving performance. Led the **backend architecture**, implemented **role-based access control**, and supported **multi-database integration**. The CMS featured dynamic content forms, modular APIs, and admin tools tailored for non-technical users. Oversaw the backend team, conducted code reviews, and ensured clean, scalable, and secure development practices.

**Key Tech:** Next.js, Drizzle ORM, Multi-DB Support, Node.js, REST API

### The National Pulse

#### Role: Full Stack Developer

- Developed a custom WordPress theme for a news platform.
- Integrated Paid Memberships Pro for subscription access.
- Implemented Stripe, Google Pay, and Apple Pay for payments.
- Focused on responsive design, performance, and SEO

### 21st Century Equipment

#### Role: Full Stack Developer (MERN + Headless WordPress)

- Built a complete e-commerce platform using Next.js & Node.js.
- Stripe payment integration and Redux for state management.
- Headless CMS integration with WordPress.
- Advanced inventory filtering (status, brand, type, location, etc.)

### PCI Security Standards Council

#### Role: Backend Developer & WordPress Specialist

- Integrated third-party services using REST APIs.
- Built custom Elementor widgets to enhance user experience.
- Optimized site for performance and backend scalability.
- Ensured secure backend logic and modular code structure

## SKILLS

**Frontend:** CSS, Cypress, HTML, Jest, jQuery, Material UI, Next.js, React, Redux, Responsive Design, SCSS, Storybook, Tailwind CSS, TypeScript

**Backend:** Express.js, FastAPI, GraphQL, JavaScript, Nest.js, Node.js, PHP, Python, REST APIs

**CMS:** Payload CMS, Plugin Development, Strapi, WordPress, WordPress (custom themes, plugins, Elementor), WordPress Development, WordPress Multisite, WordPress Theme

**Databases:** MongoDB, MySQL, PostgreSQL, Supabase

**DevOps & Tools:** AWS (basic), ClickUp, Docker, Figma, Git, GitHub, Hostinger, Jira, Kinsta, Postman, Vercel, WP-Engine

**SEO:** Core Web Vitals, On-page SEO, performance tuning, technical audits

**Payments:** Apple Pay, Google Pay, Stripe
