SUMMARY

Senior Backend Engineer with 5+ years at Revnix, promoted from Frontend Engineer to Lead Backend Engineer. Builds APIs, data sync engines and CMS platforms with NestJS, Python/FastAPI and PostgreSQL, and ships full-stack features with Next.js and WordPress. Lead contributor to Nextly, an open-source CMS for Next.js. Leads a team of 8 engineers across 7 production environments serving 50K+ users, owning architecture, releases and production reliability.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, PHP
Backend	Node.js, NestJS, Express.js, FastAPI, Flask, REST APIs, GraphQL
Frontend	React, Next.js, Tailwind CSS, Zustand, Redux Toolkit, TanStack Query
Databases	PostgreSQL, MySQL, MongoDB, SQLite, Redis, Drizzle ORM, SQLAlchemy
CMS	Nextly, WordPress (VIP, headless, Gutenberg), Payload CMS, Strapi
DevOps	Docker, GitHub Actions, AWS, Vercel, Coolify, Hetzner
Auth & Security	JWT, OAuth 2.0, RBAC, field-level permissions
AI Dev Tools	Claude Code, Cursor, Codex, GLM, CodeRabbit, Greptile
Practices	Test-driven development, code review, release management

EXPERIENCE

Revnix (formerly Revnix Technologies) Mar 2021 – Present | Pakistan

Lead Backend Engineer & Release Manager Jan 2024 – Present | Haripur

- Next AI:** Led the backend for a multi-tenant AI content-writing SaaS on Python, FastAPI, SQLAlchemy and PostgreSQL: async APIs, APScheduler background jobs, LemonSqueezy billing, and publishing to WordPress (REST API) and Shopify (App Bridge).
- 4RE Marketing Console:** Architected the NestJS, Drizzle ORM and PostgreSQL backend that replaced 4 Rivers Equipment's legacy marketing console, live in production since June 2026. Built the sync engine that imports the dealer's XML inventory feed and the John Deere catalog, with matching rules so each machine is listed once on the Next.js storefront.
- Nextly CMS:** Lead contributor to an MIT-licensed, TypeScript-native CMS for Next.js that grew out of a custom CMS built for The Backyard. Designed JWT auth with token rotation, OAuth, brute-force protection and field-level RBAC, plus database adapters for PostgreSQL, MySQL and SQLite; run release governance for every npm release.
- 21st Century & 4 Rivers Equipment:** Led a team of 4 engineers moving two Next.js e-commerce sites (1,000+ SKUs, Stripe payments) from headless WordPress to Nextly, cutting CMS infrastructure and licensing costs by about 95%.

- **Team leadership & reliability:** Lead 8 engineers across 7 production environments serving 50K+ users. Automated CI/CD with Docker and GitHub Actions and introduced structured logging and error tracking, cutting deployment effort by 70% and production incidents by 60%.

Full Stack WordPress Developer

Feb 2022 – Jan 2024 | Haripur

- **PCI Security Standards Council:** Built a multi-language, multisite WordPress VIP platform with custom Elementor widgets that extend Elementor core classes and secure REST API integrations, without third-party plugin bloat.
- **The National Pulse:** Built a custom theme for a news site with 100K+ monthly pageviews and integrated Paid Memberships Pro with Stripe, Apple Pay and Google Pay, keeping LCP under 2 seconds.
- **Headless WordPress:** Built headless WordPress backends with Next.js frontends for editorial teams managing 500+ articles.
- **WP Aegis & WP Grit:** Built two sites with Gutenberg blocks and theme.json full-site editing, and trained 3 interns on WordPress standards.
- **Performance:** Reached 90+ Lighthouse scores across 10+ client sites with Redis caching and image optimization, cutting average page load time by 35%.

Frontend Engineer

Mar 2021 – Feb 2022 | Islamabad

- Built responsive, SEO-friendly interfaces with React, Next.js and SCSS for 8+ client projects.
- Cut load times by 40% (Time to Interactive from 6s to under 3.5s) with code splitting, lazy loading and component optimization.
- Built reusable component libraries documented in Storybook, speeding up frontend delivery by 30%.

PROJECTS

SmartCourse AI *Python, Flask, SQLite, scikit-learn, Sentence Transformers* github.com/ifaisaldev/smartcourse-ai

- Course recommendation engine that compares keyword search (TF-IDF) with semantic search (all-MiniLM-L6-v2) side by side, returning ranked courses with relevance scores.
- REST API with session-based search history and an NLP preprocessing pipeline built on spaCy.

EDUCATION & CERTIFICATION

BS in Computer Science | Virtual University of Pakistan | Aug 2021 – Aug 2025

Google Cybersecurity Professional Certificate | Google | Mar 2026

Languages: English (professional), Urdu (native)
